SYDNEY

Background

Aim: Collaborate with different key interest-holders to **generate priorities** for **future fall prevention research** in the Australian Context

Background

Aim: Collaborate with different key interest-holders to implement a structured priority-setting process for future fall prevention research in the Australian Context

Method – Structured priority-setting process

Priority Setting Partnership (PSP)

- PSP = bringing patients, carers and clinicians together to identify and prioritise unanswered questions in specific conditions or areas of healthcare, for research, using James Lind Alliance methods.

Method – Structured priority-setting process

Priority Setting Partnership (PSP)

- PSP = bringing **patients, carers and clinicians** together to identify and prioritise unanswered questions in specific conditions or areas of healthcare, for research, using James Lind Alliance methods.

Priority Setting Partnership (PSP)

- PSP = bringing **patients, carers and clinicians** together to **identify and prioritise unanswered questions** in specific conditions or areas of healthcare, **for research**, using James Lind Alliance methods.

Method – Structured priority-setting process

Priority Setting Partnership (PSP)

- PSP = bringing **patients, carers and clinicians** together to **identify and prioritise unanswered questions** in specific conditions or areas of healthcare, **for research**, using **James Lind Alliance methods**.

Method – Structured priority-setting process

James Lind Alliance (JLA) method

- Step 1: Develop collaboration with interest-holders
- Step 2: Identify, summarise, and rank the most important priorities and gaps
- Step 3: Develop a strategic research agenda to address these gaps

Method – Structured priority-setting process

James Lind Alliance (JLA) method

- Step 1: **Develop collaboration** with interest-holders
- Step 2: Identify, summarise, and rank the most important priorities and gaps
- Step 3: Develop a strategic research agenda to address these gaps

- Step 2: **Identify, summarise, and rank** the most important priorities and gaps
- Step 3: Develop a strategic research agenda to address these gaps

Method – Structured priority-setting process

James Lind Alliance (JLA) method

- Step 1: **Develop collaboration** with interest-holders
- Step 2: **Identify, summarise, and rank** the most important priorities and gaps
- Step 3: **Develop a strategic research agenda** to address these gaps

Strongly Driven by Interest-holders

Method – James Lind Alliance structured priority-setting process

Method – James Lind Alliance structured priority-setting process

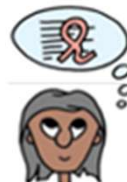

Step 1: **Develop collaboration**

Steering Group (~12)

= Representatives,
Developing and
analysing surveys

Patients
(older
adults)

Carers

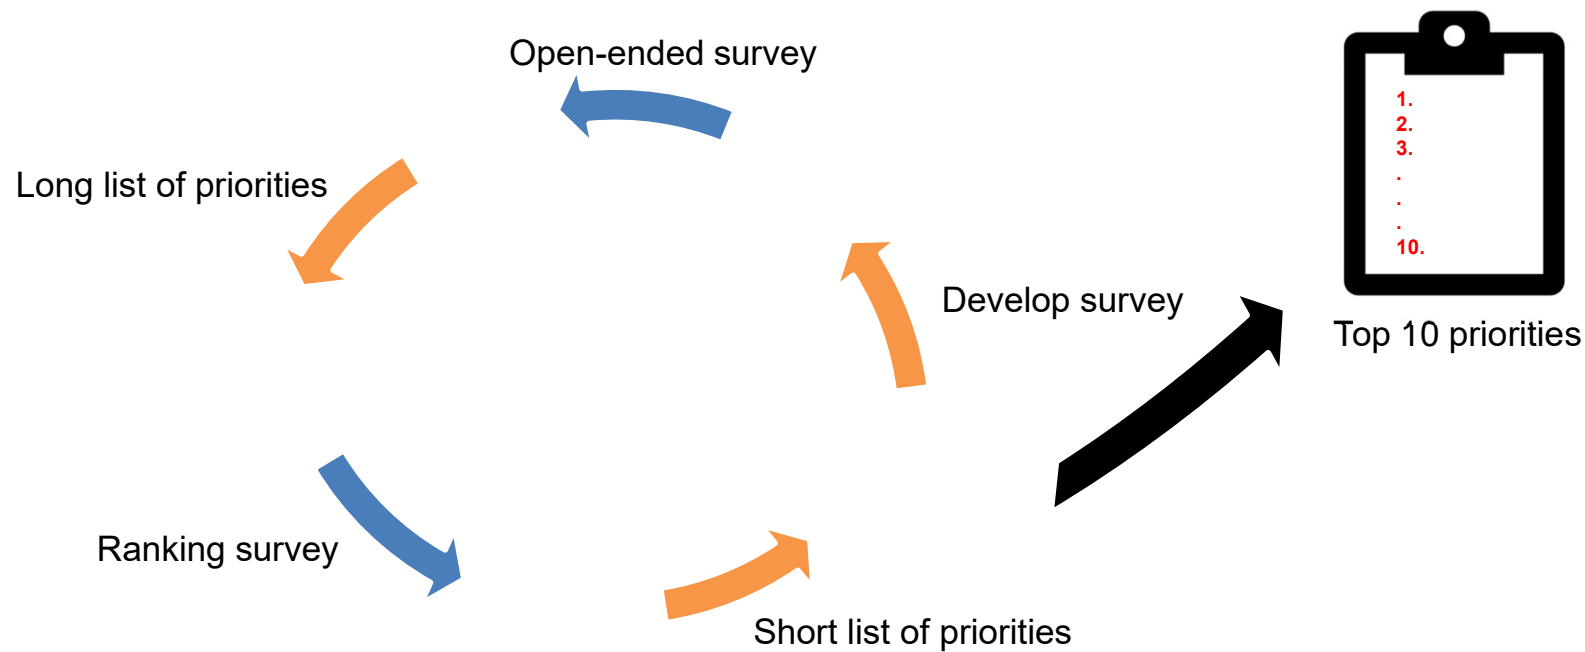

Clinicians

Survey Respondents (~200)

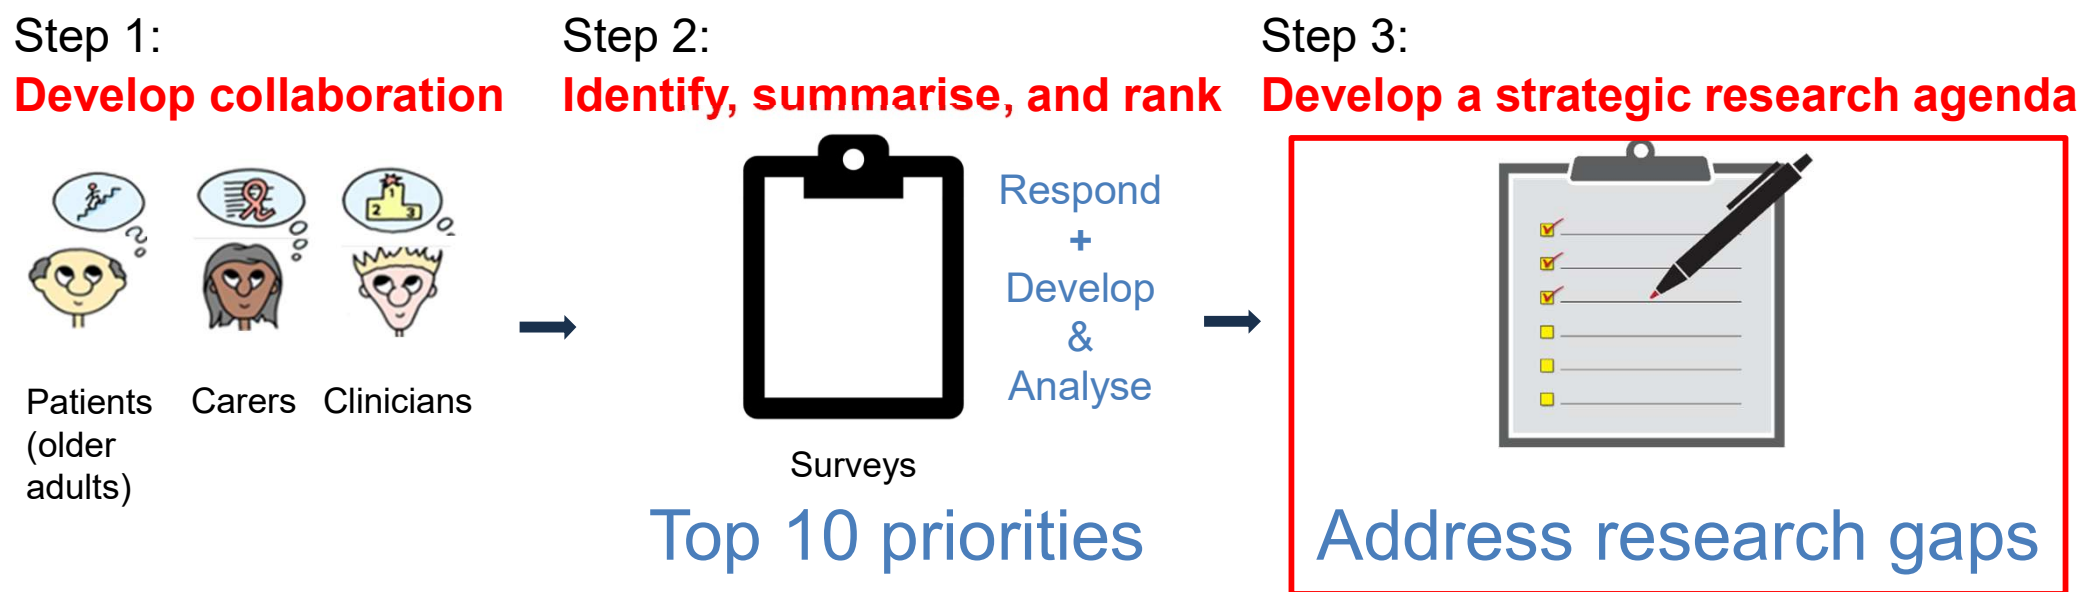

= External to Steering Group,
Responding to surveys only

Method – James Lind Alliance structured priority-setting process

Step 2: **Identify, summarise, and rank**

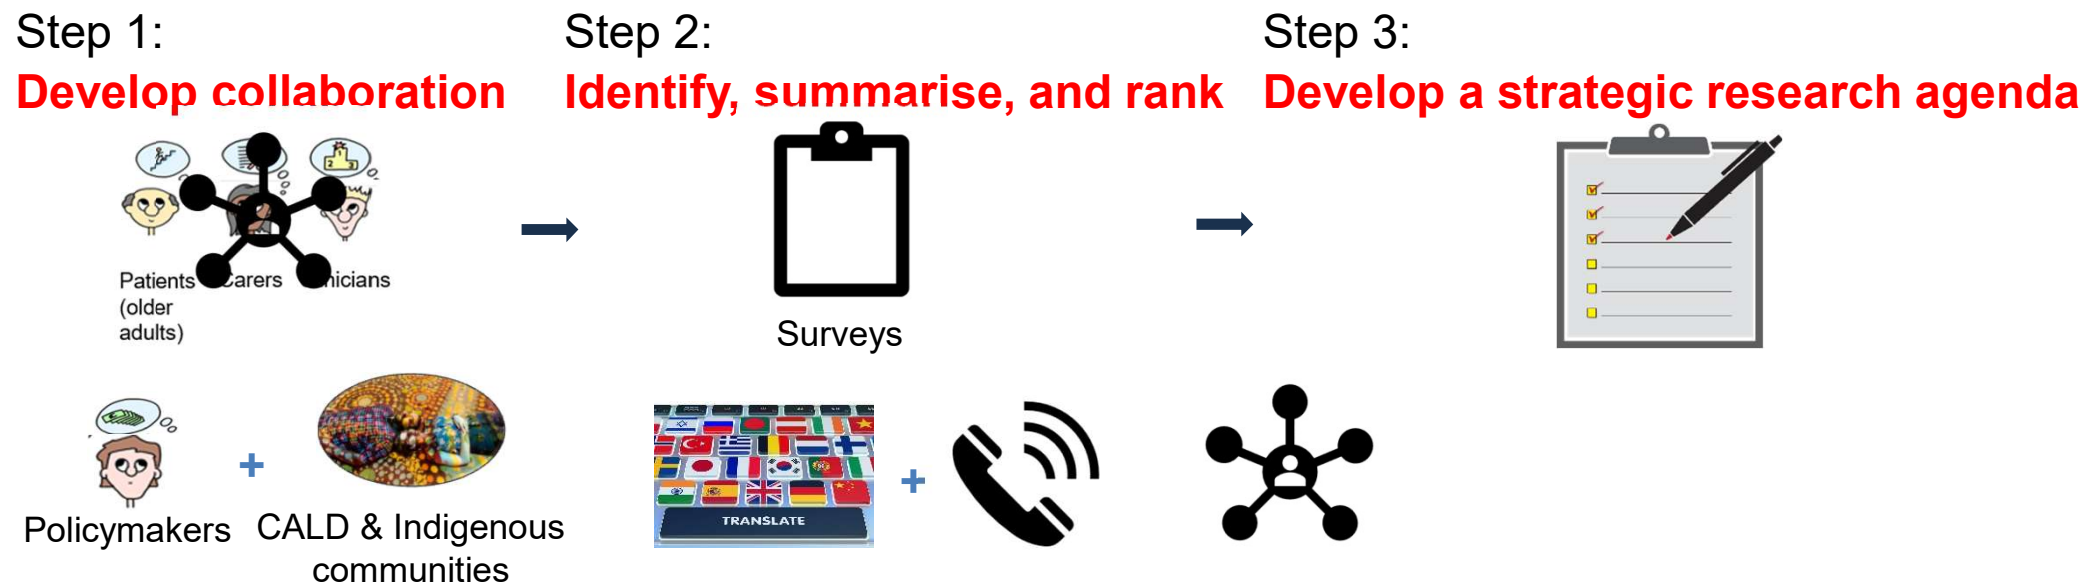

Method – James Lind Alliance structured priority-setting process

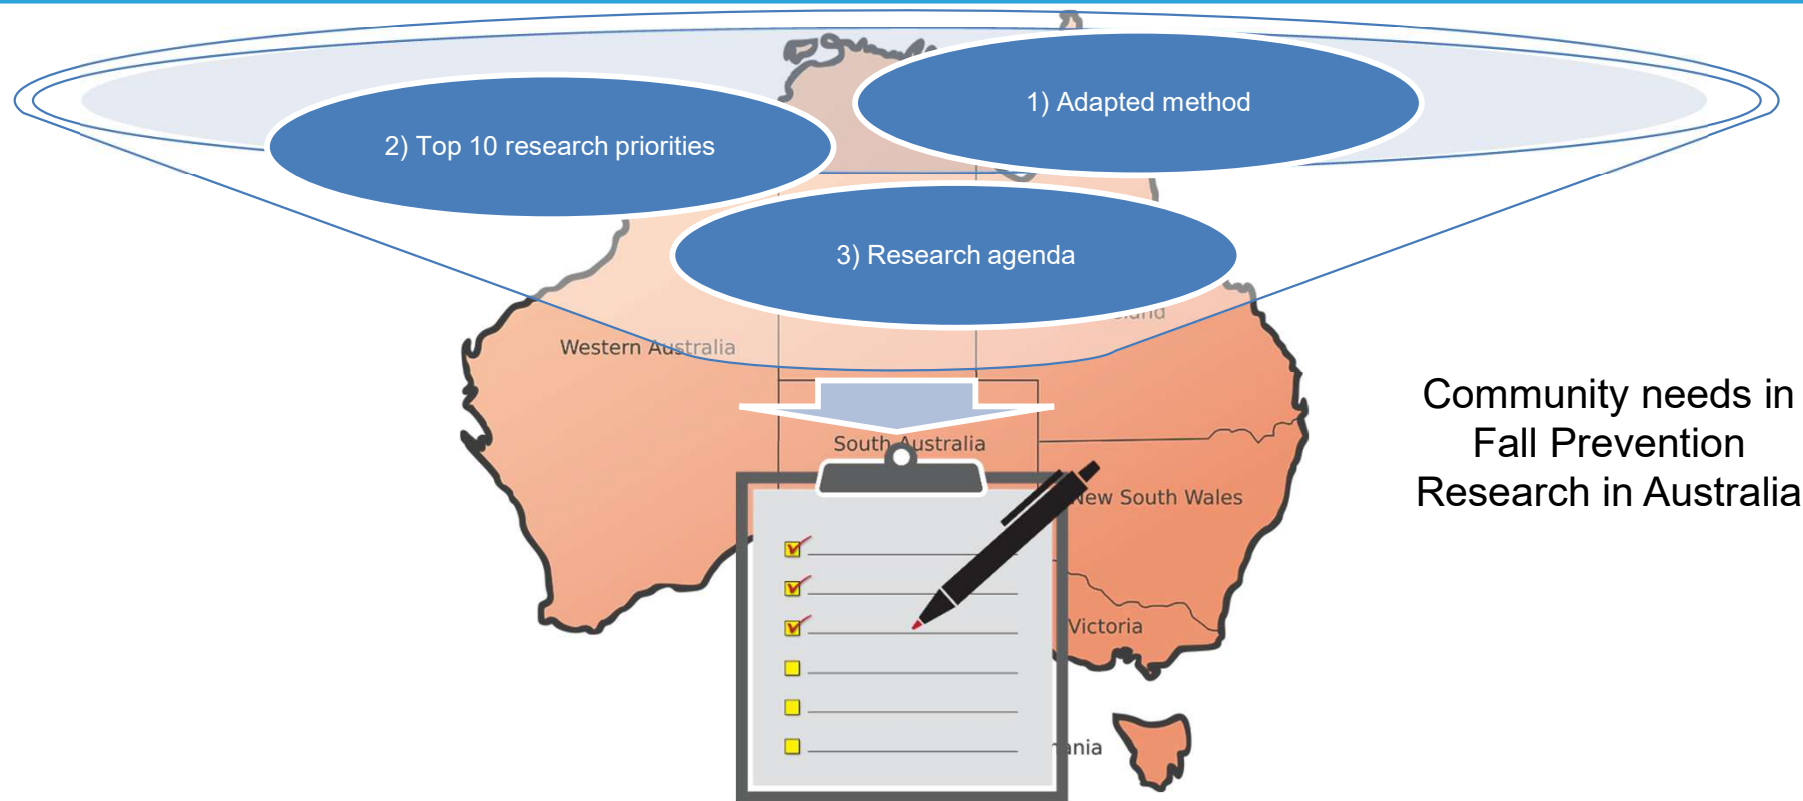

Method – James Lind Alliance structured priority-setting process

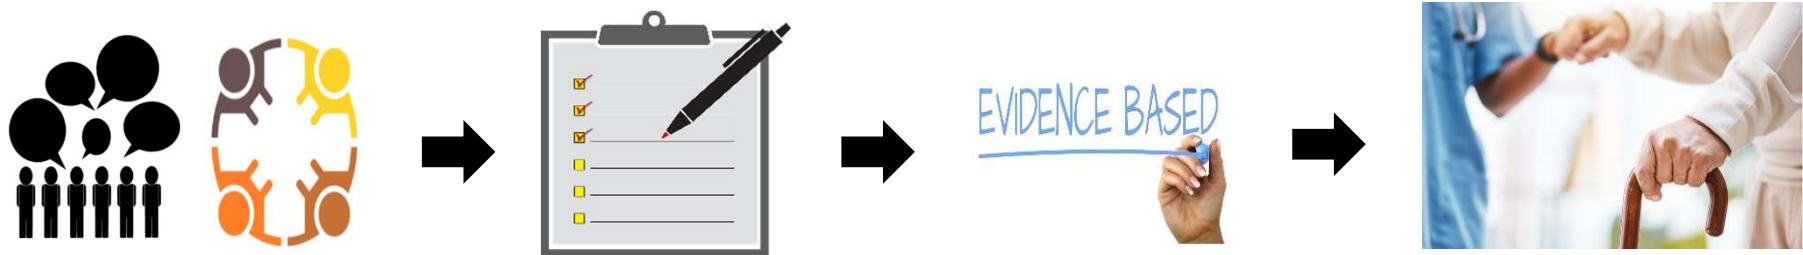

Adaptable framework

Deliverables

Conclusion

Directing research efforts to high-priority area

Supporting more equitable healthcare resource allocation

Facilitating the implementation of fall prevention evidence in the community
