# FALLS COLLABORATIVE

---

*‘Keeping older people safe in our care’*

## Aim

Reduce falls and serious harm from falls by  
5% within 12 months

Inclusions: Age  $\geq 70$  years  
Inpatients in a health service  
Partial or assisted fall  
Exclusions: Staff, visitors

*Appreciation for a System*

***“Every System is perfectly designed to deliver the results that it gets.”***

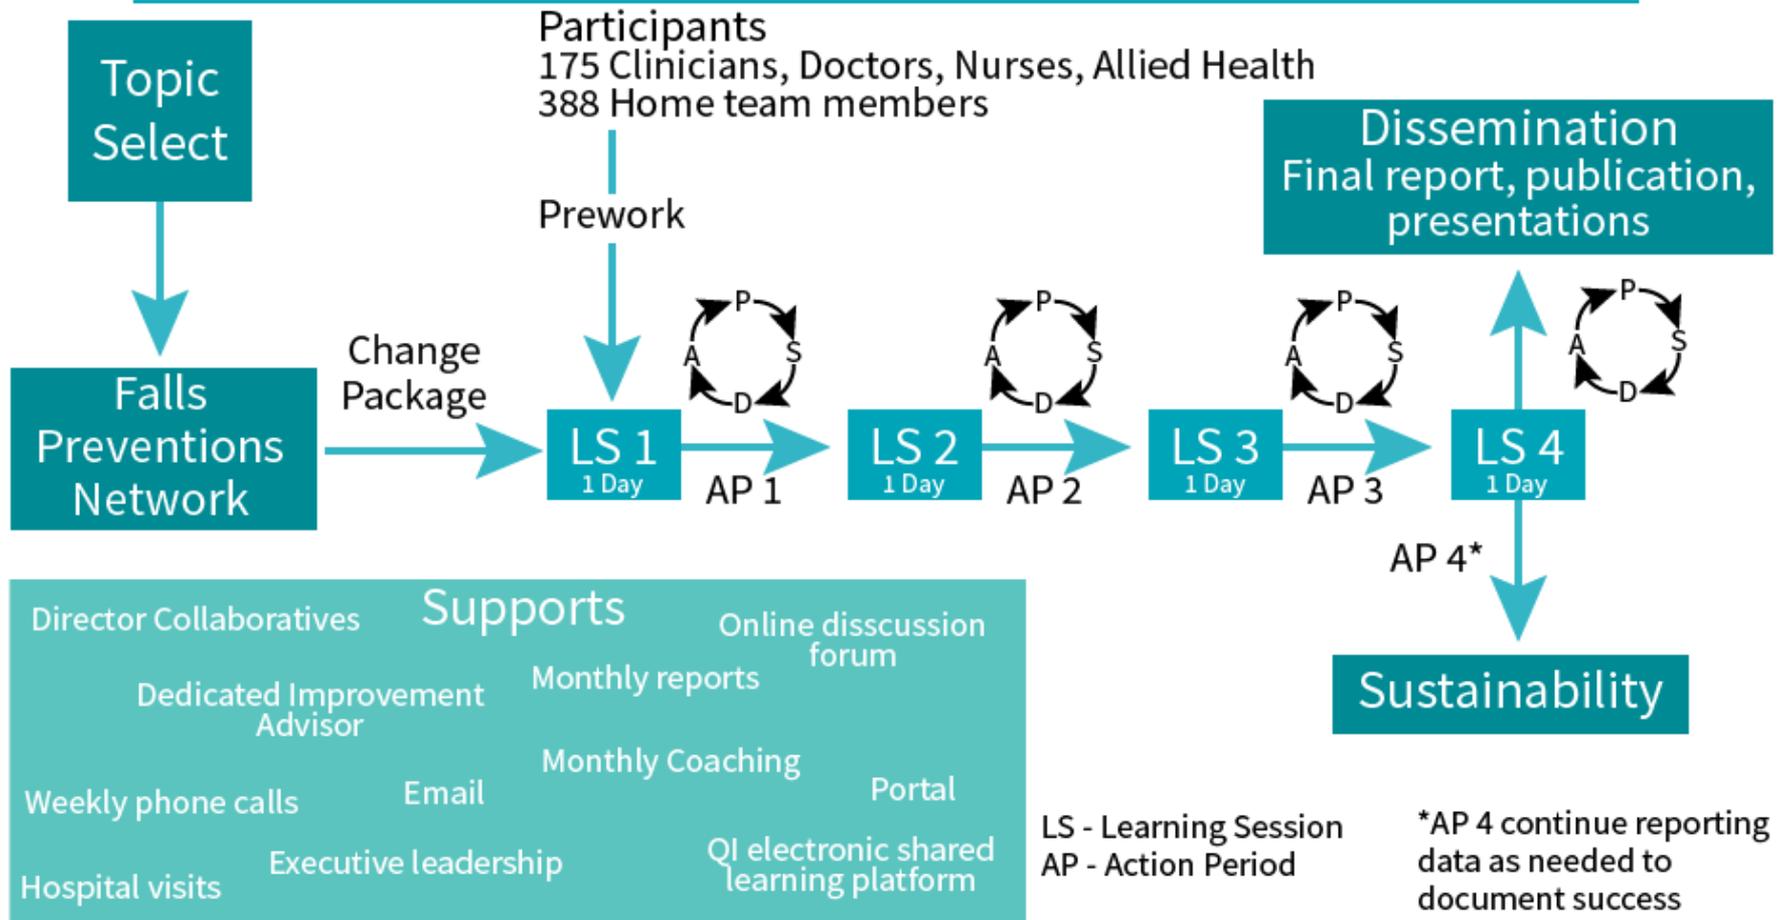

*Theory of Knowledge*

*Psychology of change*

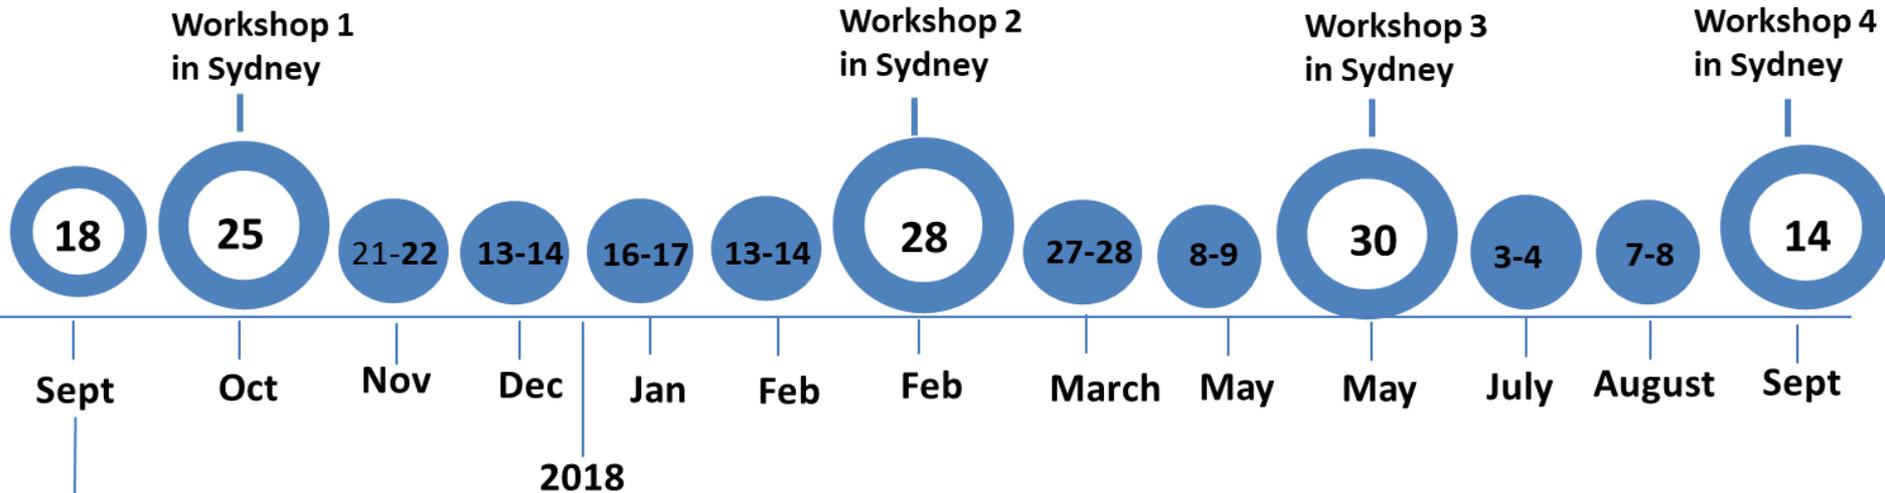

*Unwarranted Variation*

# FALLS CHANGE PACKAGE

## Falls Collaborative Driver Diagram

## Primary Drivers

## Secondary Drivers

### The Problem:

In 2016, 38 patients died in NSW public hospitals following a fall-related incident. In addition, there were 458 fall-related incidents resulting in serious patient harm

**SMART Aim:** Reduce falls and serious harm from falls by 5% within 12 months

### Outcome Measure:

**How much:** Decrease rate of falls with harm by 5% by 30 June 2018.

*Inclusions: Age ≥ 70 years  
Inpatients in a health service  
Partial and assisted falls  
Exclusions: Staff, visitors.*

Recognition of patient at risk and plan of care

Medication Management

Intentional Rounding

Safe mobilisation

Fall Risk Screening tool (OMSS)

Fall Risk and Assessment Management Plan (FRAMP) completion

Cognitive screening

Delirium screening

Orthostatic hypotension screening and monitoring

Issues with toileting

Identification of visual issues

Re-screening on change of patient condition, transfer to ward

Post fall management

Completion of care plan

Medication review

Medication reconciliation

Reduction of the inappropriate use night sedation

Patient Environment

Toileting

Pain management

Patient positioning

Mobility assessment

Appropriate equipment

Skilled Nurse / AHP

Environmental review

# Using Rapid- Cycle Testing

*Plan*

*Do*

*Study*

*Act*

Why,  
evaluate the impact  
of potential changes  
on a given aim?

# Your Aim & Measures

---

- **AIM**

- Improve the performance of a paper aeroplane to maximize the distance it flies and the accuracy of the flight

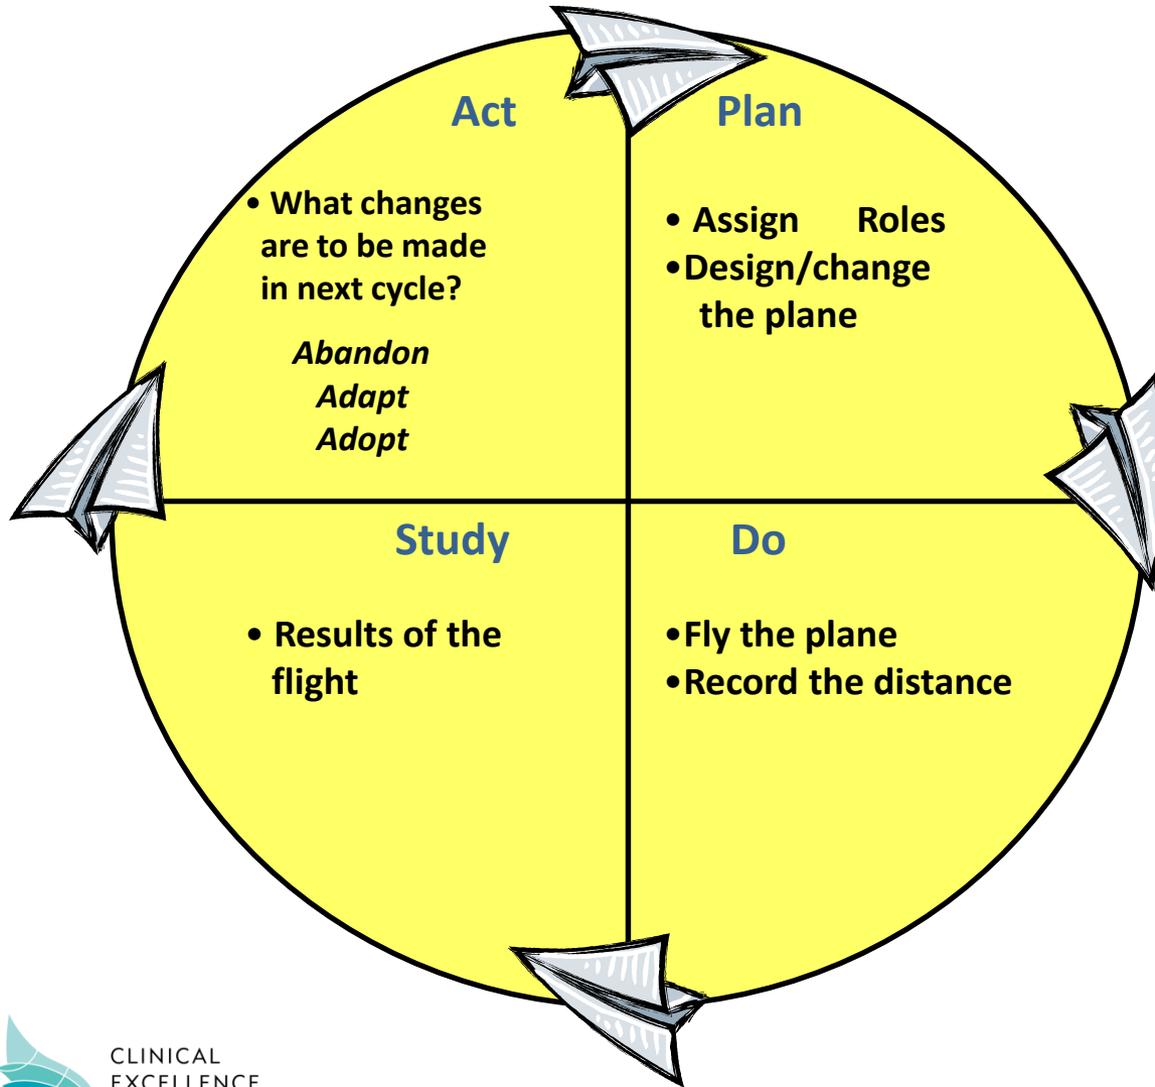

- **M e a s u r e s**

- Distance in meters

- Accuracy of the landing (total landing points)

*Flight*

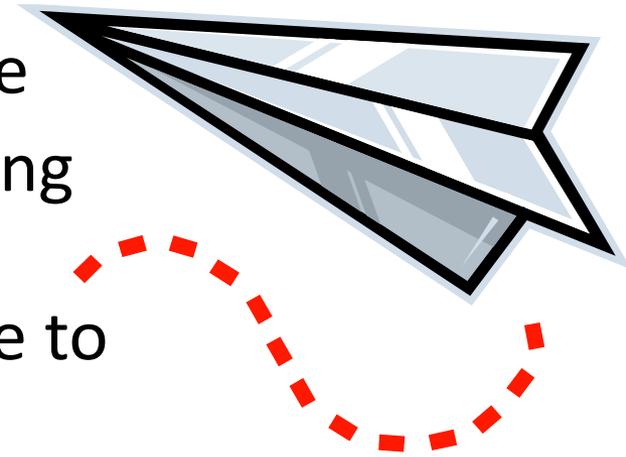

# PDSA Cycle for Improvement

# *Flight* PDSA Cycle for Improvement

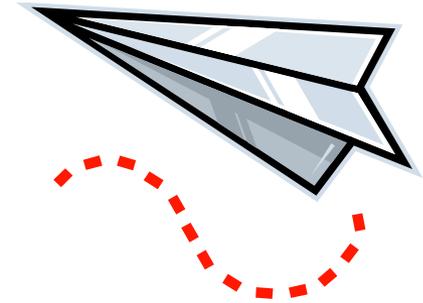

## Rules

- Only one design change per PDSA cycle
- Each team designs and commits to flying only one plane
- All planes must have wings and be able to fly
- Each design is flown by each of the three pilots
- In order to fly you must get clearance from the air traffic controller

# PDSA Cycle for Improvement *Flight*

- Assign the following roles
  - Team Lead
  - Pilots x 3
  - Data collection/scribe
  - Design Team
- Decide on a Name for your TEAM
- Design and build a paper airplane for distance

## **Flight One Collect Your Baseline DATA**

- Pilot 1, 2 and 3 will fly the plane and record the data;

## **Repeat**

- Rapid Cycle: More cycles = more data = more chances to improve

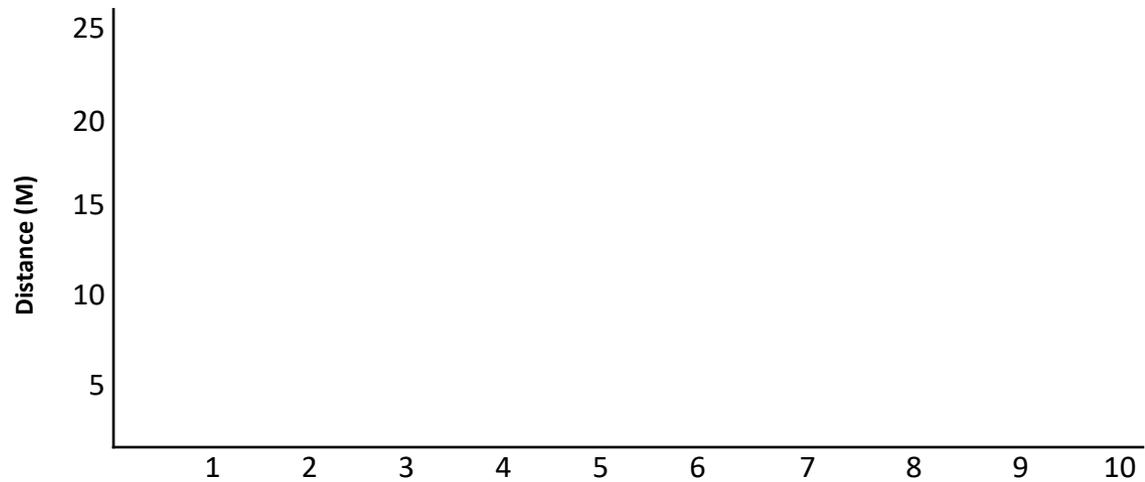

What is your theory?
